GIPI Le sedie

Dal 1984 l'eccellenza
e l'affidabilità di GIPI LE SEDIE,
questi siamo noi.

Since 1984 the excellence and reliability
of GIPI LE SEDIE, these are us.

Passione, dedizione ed amore per il proprio lavoro
e per le cose belle e funzionali sono alla base del
nostro impegno quotidiano. Sviluppiamo processi
ponendo massima attenzione alla loro impronta
ecologica, minimizzando l'impatto sulle risorse
ambientali impiegate utilizzando anche energia
rinnovabile e concependo prodotti che hanno
a cuore il benessere delle persone, la praticità
e la durata nel tempo.

Le nostre proposte scaturiscono da una costante
ricerca su materiali e finiture, attenti ad ascoltare
le esigenze dei clienti.

Creiamo concetti di arredo che si tramutano
in nuove soluzioni per vivere piacevoli emozioni
all'interno dello spazio conviviale contemporaneo
delle nostre case.

Sappiamo di poter offrire innumerevoli
combinazioni di colori e materiali per rendere
straordinariamente unico ogni nostro prodotto
per la casa. In ogni particolare e finitura tutta
l'esperienza di chi da oltre 35 anni immagina
e realizza complementi d'arredo con inconfondibile
stile e passione per il proprio lavoro.

Questo è il nostro mondo e questo è il nostro
modo di progettare articoli che arredino e rendano
piacevole, conviviale ed accogliente le nostre case.

GIPI LE SEDIE

Passion, dedication and love for
one's work and for beautiful and
functional things are at the base
of our daily commitment.

We develop processes paying
maximum attention to their
ecological footprint, minimizing the
impact on environmental resources
used and conceiving products that
care about people's well-being.

Our proposals stem from a constant
research on materials and finishes,
attentive to listening to customer
needs. We create furniture concepts
that turn into new solutions to

live pleasant emotions within the
contemporary convivial space of
our homes. We know we can offer
countless combinations of colors
and materials to make each of our
products for the home extraordinarily
unique. Every detail is conceived
to transform the creative idea into
a functional object able to last for
a long time, our products, tables,
consoles, chairs and armchairs,
pass unscathed over the years and
resist the stress of continuous use.
In every detail and finish all the
experience of those who for over
30 years imagines and creates
furnishing accessories with
unmistakable style and passion
for their work.

This is our world and this is our way
of designing items that furnish and
make our homes pleasant, convivial
and welcoming.

Contenuti e valori/

CONTENTS & VALUES

ECONOLOGIA

Ogni dettaglio è concepito per trasformare l'idea creativa in un oggetto funzionale in grado di durare a lungo nel tempo. Usare più a lungo un prodotto significa ridurre la quantità dei rifiuti prodotti da smaltire ed avere oltre al beneficio ecologico anche quello economico.

I nostri prodotti, tavoli, consolle, sedie e poltrone, attraversano indenni il trascorrere degli anni seguendo il concetto “Comprare una volta e comprare meglio”.

ECONOLOGY

Every detail is designed to transform the creative idea into a functional object that can last over time. Using a product longer means reducing the amount of waste produced to be disposed of and to have in addition to the ecological benefit also the economic one.

Our products, tables, consoles, chairs and armchairs, pass through the years unscathed following the concept “Buy once and buy better”. We work for a better world for us and for Nature.

SOSTENIBILE – DURATURO – VALORE PER LA VITA

La sostenibilità è la caratteristica di un processo o di uno stato che può essere mantenuto a un certo livello indefinitamente. Il principio guida della sostenibilità è lo sviluppo sostenibile, che riguarda, in modo interconnesso, l'ambito ambientale, quello economico e quello sociale. Il percorso verso il raggiungimento della sostenibilità rappresenta anche una sfida sociale che coinvolge anche gli stili di vita individuali e il consumo critico. Consumare in maniera critica significa rispettare una serie di criteri nelle fasi di scelta come la qualità; “Compra meno scegli meglio e fai durare a lungo ciò che compri, punta sulla qualità non la quantità” (Vivienne Westwood). “Compra una volta, compra bene, meno ma meglio” (Carlo D'Inghilterra).

SUSTAINABLE - LASTING - VALUE FOR LIFE

Sustainability is the characteristic of a process or state that can be maintained at a certain level indefinitely. The guiding principle of sustainability is sustainable development, which concerns, in an interconnected way, the environmental, economic and social spheres. The path towards achieving sustainability also represents a social challenge that also involves individual lifestyles and critical consumption. Consuming in a critical way means respecting a series of criteria in the phases of choice such as quality; “Buy less, choose better and make what you buy last a long time, focus on quality not quantity” (Vivienne Westwood). “Buy once, buy well, less but better” (Charles of England).

PIANI IN VETROCERAMICA

La porcellana e il vetro laminati tramite uno strato sottile sintetico (EVA) crea un “sandwich” di sicurezza tanto che se infranto i pezzettini di vetro e o porcellana rimangono al loro posto piuttosto che disperdersi in frammenti pericolosi. Il piano in vetro-ceramica è oggi uno dei materiali più resistenti e pratici da utilizzare come piano di un tavolo, la estrema resistenza superficiale la leggerezza e flessibilità della lastra di Porcellana laminata abbinata alla rigidità e planarità del vetro offrono una superficie estremamente fruibile in casa, è igienico, resistente ai funghi (nessuna crescita fungina), resistente all'abrasione, resistente ai prodotti da pulizia, resistenza al freddo e al caldo e non assorbe acqua (liquidi acquosi), un prodotto estremamente duraturo se usato correttamente.

GLASS CERAMIC TOPS

Porcelain and glass laminated with a thin synthetic layer (EVA) creates a safety “sandwich” so that if broken, the pieces of glass and porcelain remain in place rather than disperse in dangerous fragments. The glass-ceramic top is today one of the most resistant and practical materials to be used as a table top, the extreme surface resistance the lightness and flexibility of the laminated porcelain plate combined with the stiffness and flatness of the glass offer an extremely usable surface at home, it is hygienic, resistant to fungi (no fungal growth), resistant to abrasion, resistant to cleaning products, resistance to cold and heat and does not absorb water (aqueous liquids), an extremely long-lasting product when used correctly.

LEGNO VECCHIO

Il legno vecchio di Rovere (Quercus Robur), ricavato principalmente da travi da solaio, è caratterizzato da alborno giallastro e durame bruno, ha una caratteristica figurativa, che si manifesta dopo la fase di tranciatura, contraddistinta da venature concentriche a forma di anello che producono figure sorprendenti o strisce longitudinali sul piano, ha un colore che varia dal bianco-grigio al giallomarrone, si evidenziano anche le caratteristiche crepe e nodini del legno anziano, l'ossidazione, medio bassa, tende a uniformarsi da un giallo-bruno ad un giallo-dorato, le venature e la coloritura al naturale sempre diverse da piano di tavolo a piano di tavolo rendono il prodotto unico; tecnicamente è un legno a durezza medio-elevata, con un assorbimento molto basso e con una tendenza al movimento-ritiro basso, l'impiallacciatura di “ROVERE SPACCATO” (RSP) la trovate nei nostri migliori tavoli impiallacciati, l'utilizzo del suddetto “legno vecchio” dona al tavolo il calore del legno rendendolo molto affidabile e pratico nell'utilizzo quotidiano minimizzando le qualità negative di instabilità caratteristiche del legno massiccio.

OLD WOOD

The old oak wood (Quercus Robur), obtained mainly from ceiling beams, is characterized by yellowish sapwood and brown heartwood, has a figurative characteristic, which manifests itself after the shearing phase, characterized by concentric ring-shaped veins that produce surprising figures or longitudinal stripes on the top, it has a color that varies from white-gray to yellow-brown, the characteristic cracks and knots of the old wood are also highlighted, the oxidation, medium-low, tends to become uniform from a yellow-brown to a golden-yellow, the veins and the natural coloring always different from table top to table top make the product unique; technically it is a medium-high hardness wood, with a very low absorption and with a low movement-shrinkage tendency, the veneer of “SPLIT OAK” (RSP) can be found in our best veneered tables, the use of the aforementioned “old wood” gives the table the warmth of wood making it very reliable and practical in everyday use, minimizing the negative qualities of instability characteristic of solid wood.

GREEN ECO-SOSTENIBILE

L'investimento in energie rinnovabili di ultima generazione, green, è stata per noi una priorità, il nostro contributo verso un rinnovamento eco-sostenibile, abbiamo contribuito a ridurre emissione di CO2 per oltre 20.000kg annui.

GREEN - ECO SUSTAINABLE

Investing in the latest generation of green renewable energy has been a priority for us, our contribution towards eco-sustainable renewal, we have contributed to reducing CO₂ emissions by over 20,000kg per year.

Emissioni CO₂ evitate
21.403,15 kg

Alberi equivalenti piantati

VETRO ANTIMPRONTA

I nostri tavoli, ove previsto, possono adottare il piano in vetro antimpronta, il trattamento superficiale adottato rende la superficie perfettamente liscia al tatto è altamente resistente alle impronte e di facile pulizia. Queste prestazioni sono frutto di uno speciale procedimento produttivo di incisione chimica del vetro piano, il vetro risulta setoso e più caldo al tatto, opaco alla vista e soprattutto ANTIMPRONTA.

ANTI-FINGERPRINT GLASS

Our tables, where feasible, can use the glass anti-fingerprint. Surface treatment adopted makes the surface perfectly smooth to the touch is highly resistant to fingerprints and easy to clean. This performance is the result of a special production process of chemical etching of glass. The glass is more silky and warm to the touch, opaque to the eye and especially FINGERPRINT.

LAMINATO HPL

Da molto tempo utilizziamo il laminato hpl per confezionare i piani dei nostri tavoli, materiale in cui crediamo per la comprovata robustezza e affidabilità nel tempo, le principali caratteristiche: resistenza ai graffi, agli urti, all'umidità e al calore fino a 80°, facile da pulire, idoneo al contatto con gli alimenti, di recente a seguito dell'evoluzione che questi materiali hanno avuto, abbiamo adottato dei laminati con una ulteriore maggiore resistenza superficiale ai graffi e all'usura che trovate nei nostri migliori modelli, nonché la possibilità di trattamento superficiale antibatterico.

HPL LAMINATE

We have been using HPL laminate for a long time to package the tops of our tables, a material in which we believe for its proven strength and reliability over time, the main characteristics: resistance to scratches, bumps, humidity and heat up to 80 °, easy to clean, suitable for contact with food, recently following the evolution that these materials have had, we have adopted laminates with a further greater surface resistance to scratches and wear that you find in our best models, as well as the possibility of antibacterial surface treatment.

Contenuti e valori/

CONTENTS & VALUES

GAMMA COLORI

La nostra gamma colori di serie è da sempre molto vasta,aggiornata periodicamente con i colori di tendenzadell'arredamento contemporaneo; siamo inoltre in gradodi personalizzare i nostri prodotti in accordo con le vostreesigenze di colore a campione sia su scala RAL che dacampione fisico (ci riserviamo sempre tuttavia di valutare caso per caso).

COLORS RANGE

Our range of standard colors has always been very wide, updated periodically with the trendy colors of contemporary furnishings; we are also able to customize our products according to your needs color to sample both on a RAL that physical sample (we reserve however always to evaluate the feasibility case by case).

TESSUTO DEL CLIENTE

Anche il nostro campionario tessuti è abbastanza nutrito, tuttavia il nostro orientamento al servizio prevede la possibilità di confezionare la tappezzeria di alcuni nostri prodotti con il tessuto fornito dall'acquirente. Vogliate sempre chiedere preventivamante la possibilità di realizzare ciò di cui avete bisogno.

CUSTOMER'S FABRICS

Even our tissue samples is quite large, however our service orientation also provides the ability to package upholstery of some of our products with the fabric supplied by the purchaser. (Please, always ask in advance the possibility of realizing what you need).

TINTE ALL'ACQUA

Le tinte che usiamo per colorare i nostri prodotti, sedie e tavoli, nei colori legno del nostro campionario sono da sempre a base di acqua, resina e pigmento (colore), l'utilizzo di questi prodotti piuttosto che altri garantisce una maggiore naturalità del colore ottenuto, una alta penetrazione nel supporto (il legno) quindi maggiore stabilità di colore anche in caso di urto o graffio. Inoltre riscontriamo quanto segue: "Le vernici ad acqua sono conosciute anche come idrosolubili e a basso impatto ambientale. Il loro sviluppo è la conseguenza di una sempre maggior attenzione all'ambiente da parte di aziende e consumatori. Usando vernici ad acqua si riduce infatti del 95% l'emissione nell'ambiente di COV (Composti Organici Volatili) rispetto all'utilizzo di vernici a solvente. Inoltre le vernici ad acqua sono inodori, non infiammabili e a bassa tossicità."

WATER COLORS

The colors we use to color our products, chairs and tables, in the colors of our wood samples are always water-based, resin and pigment (color), the use of these products rather than other provides more natural color obtained, a high penetration into the substrate (the wood) and then increased color stability even in case of impact or scratch. In addition we find the following: "The water-based paints are also known as water-soluble and environmentally. Their development is the consequence of an increasing focus on the environment by businesses and consumers. By using water-based paints can shorten the 95 % the environmental release of VOCs (Volatile Organic Compounds) than using solvent based coatings. in addition, the water-based paints are odorless, non-flammable and low toxicity.

TAVOLI ALLUNGABILI

I tavoli allungabili e super-allungabili sono nel nostro DNA, li costruiamo da sempre, le Vostre esigenze sono la nostra ispirazione. La maggior parte dei nostri tavoli utilizzano meccanismi di allungo di ultima generazione, leggeri, scorrevoli, molto robusti e affidabili; i meccanismi adottati sono frutto della nostra ricerca e sperimentazione, vengono costruiti secondo i nostri dettami, interamente in alluminio anodizzato o acciaio e alluminio, sono bloccabili in ogni posizione, sincronizzati e estremamente robusti e affidabili; abbiamo i nostri tavoli allungabili nelle case di tanti clienti da oltre venti anni - provate a domandare!

EXTENSIBLE TABLES

The extendable tables and super-extendable are in our DNA, we construct them from always, your needs are our inspiration. Most of our dining tables using mechanisms of extension of the latest generation, light, sliding, very robust and reliable; the mechanisms adopted are the result of our research and experimentation, are built according to our dictates, are constructed entirely in anodized aluminum or steel and aluminum, are lockable in any position, synchronized and extremely robust and reliable; we have our extendable tables in the homes of many customers for over twenty years - try to ask!

VERNICIATURA ACRILICA

La finitura ACRILICA viene utilizzata su tutti i nostri migliori prodotti in legno. Le vernici acriliche possiedono nei confronti delle vernici a base di resine sintetiche molti vantaggi tra i quali per esempio:

- Migliori caratteristiche meccaniche quali la resistenza ai graffi, la durezza della superficie verniciata, l'elasticità.
- Più resistente ai detergenti e agli agenti atmosferici.
- Migliore protezione contro gli agenti corrosivi in combinazione con il fondo applicato.
- Nessuno scolorimento naturale della base legante
- Migliore resistenza contro l'ingiallimento.
- Riverniciabile con lo stesso tipo di vernice in ogni momento (la vernice sintetica solamente entro 2 ore oppure dopo 24 ore).
- Dopo l'essiccazione in profondità riverniciabile con altri tipi di vernice (le vernici sintetiche si staccano).
- Essiccazione molto più rapida (fuori polvere in 10 minuti invece che in 30 minuti, al tatto in 15 invece che in 180 minuti).

ACRYLIC PAINTS

The finish ACRYLIC is used on all our best wood products. "Acrylic paints have towards the paints based on synthetic resins many advantages including for example:

- Improved mechanical properties such as resistance to scratches, the hardness of the coated surface, the elasticity.
- More resistant to detergents and weathering.
- Better protection against corrosive agents in combination with the fund applied.
- No discoloration of the natural base binder.
- Improved resistance against yellowing.
- Overcoated with the same type of paint at all times (the synthetic paint only within 2 hours or after 24 hours).
- After drying deep recoated with other types of paint (the synthetic paints come off).
- Much more rapid drying (dust free in 10 minutes instead of 30 minutes, to the touch in 15 instead of 180 minutes)."

VERNICIATURA A POLVERE EPOSSIDICA

La maggior parte (ove indicato) dei nostri prodotti in metallo viene verniciata a polvere epossidica, metodo molto valido per preservare efficacemente il manufatto e l'ambiente; il presente procedimento presenta le seguenti caratteristiche e vantaggi: "La verniciatura a polveri è un procedimento di rivestimento di superfici metalliche con un film organico, effettuato a scopo decorativo e/o di protezione dalla corrosione e da agenti aggressivi. I pezzi in lavorazione vengono ricoperti di polvere verniciante a base di resine sintetiche, che aderisce per effetto elettrostatico, e poi passati in un forno dove a causa della temperatura la vernice prima fonde e poi polimerizza dando uno strato aderente. Il risultato in termini di aderenza, durata e resistenza alla corrosione è molto elevato. In effetti lo spessore dello strato verniciante ottenibile con questa tecnologia è nettamente superiore a quello ottenibile con vernice liquida (si superano agevolmente i 100 micrometri) e le caratteristiche meccaniche (durezza, elasticità) possono essere molto elevate. Con la verniciatura a polvere (anche chiamata plastificazione) si possono comunque ottenere ottime prestazioni sia a livello di finitura, che di tenuta meccanica. Trova una vasta applicazione a livello industriale, in quanto dal punto di vista qualitativo è di facile applicazione e dal punto di vista ecologico e dell'ambiente di lavoro elimina il problema dei solventi, ma dato il procedimento necessario per il cambio del colore, la produzione viene normalmente eseguita a grandi lotti colore."

EPOXY POWDER COATED

Most (if indicated) of our metal products are epoxy powder coated, very good method to effectively preserve the artifact and the environment; the present method has the following features and benefits: "The powder coating is a process for coating metal surfaces with an organic film, made for decorative purposes and / or protection from corrosion and aggressive agents. The workpieces are covered of powder coating based on synthetic resins, which adheres by electrostatic effect, and then passed into an oven where due to the temperature before the paint melts and then cures giving an adherent layer. The result in terms of adhesion, durability and resistance to corrosion is very high. In fact the thickness of the coating obtained with this technology is clearly superior to that obtained with liquid paint (it easily exceed 100 micrometers) and mechanical characteristics (hardness, elasticity) can be very high, with the coating powder (also called lamination) can still get excellent performance both in terms of finish, that of the mechanical seal. Find a wide industrial application, since from the point of view of quality and is easy to apply from the ecological point of view of the working environment and eliminates the problem of the solvent, but since the processing needed for the change of color, the production is normally performed in large batches color."

Il tavolo è uno degli angoli più utilizzati della casa: per la colazione, il pranzo e la cena, i compiti di scuola, i disegni e i ritagli dei bambini, le chiacchiere davanti a una tazza di tè...

Un magico oggetto che viene usato in ogni momento della giornata. Ha il compito di soddisfare il nostro senso estetico ed essere resistente e facile da pulire per sostenere tutte le nostre attività.

Per questo i nostri tavoli vengono realizzati con materiali di nuova generazione, di alta qualità, per garantire un prodotto che soddisfi tutte le tue esigenze.

Quale materiale sceglieresti?
